#### III. DETAILED ACTION

Claims 1-15 are presented for examination.

In response to communications filed on October 31, 2003, the Claims 1-15 are pending in the application. Applicant's arguments have been reconsidered but are not deemed persuasive for the reasons set forth below.

# Response to Applicant's Remarks

Examiner has completed a through review and study of Applicant's amendment of October 31, 2003; especially, Applicant's remarks to claims 1-15 on pages 6-8.

Applicant's remarks amendments to claims 1-15 further direct the claimed invention to a "method and system" in a content query environment.

Examiner asserts that Mann et al. (U.S. Patent# 6,298,341 B1 and Mann hereinafter) in view of Monahan et al. (U.S. Patent# 6,523,037 B1 and Monahan hereinafter in combination with teaches Applicant's new claimed invention of "method and system" in a content query environment.

Regarding Applicant's remarks about the claimed,
"identifying, according to properties returned by a plurality of
search engines, at least one search engine suited to service a
query having at least one content category of the plurality of

Art Unit: 2175

content categories", Examiner asserts that Mann teaches the claimed, "identifying, according to properties returned by . . . . at least one search engine suited to service a query having at least one content category of the plurality of content categories", (see Mann col 3, lines 40-55; col 4, lines 27-29; col 7 lines 1-22; and see Figure 5A, #507).

Monahan teaches the claimed, "plurality of search engines" (i.e. by using the Internet using for example, Alta Vista, Google...) (see col 1, lines 14-26).

Examiner asserts that the combination of Mann and Monahan teaches Applicant's claimed invention with the motivation to a person of ordinary skilled in the art at the time of Appliant's invention (cited in the Office action dated May 27, 2003) in order to allow a user to a particular web site that may be of interest (See Monahan, col 1, lines 26-33) and to provide for search engines technology so as to allow visitors to a particular web site to locate documents or features that may be of interest (See Monahan, col 1, lines 26-33).

Examiner asserts that Mann in combination with Monahan teaches Applicant's invention.

Applicant is inaccurate for the reasons explicitly stated in the first Office Action dated May 27, 2003 and this new office action.

Application/Control Number: 09/752,799 Page 4

**Art Unit: 2175** 

These reasons have been explicitly stated in the first Office Action. Please see the next section.

## Claim Rejections - 35 USC 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mann et al. (U.S. Patent# 6,298,341 B1 and Mann hereinafter) in view of Monahan et al. (U.S. Patent# 6,523,037 B1 and Monahan hereinafter).

Regarding Claims 1, 6, and 11, Mann teaches the claimed, "storing a plurality of content categories" (i.e. data store 110 for storing adjunct terms and, possibly, available domain name lists, InterNIC) (col 3, lines 50-55); and identifying (i.e. users may access a domain name service and system and receive lists of available candidate domain names) (col 3, lines 40-55) according to properties returned by (i.e. the Internet) (col 3,

Art Unit: 2175

lines 40-55), at least one search engine (i.e. via the internet .... WWW browser; see also Figure 5A search button) (col 4, lines 27-29) suited to service a query (i.e. user may enter search terms) (col 7, lines 1-22) Figure 5A, #507) having at least one content category of the plurality of content categories (Figure 5A, #507; see also col 7, line 1-22).

Mann does not expressly teach the claimed, "a plurality of search engines".

Monahan teaches the claimed, "a plurality of search engines" (i.e. Alta Vista, Google...) (col 1, lines 14-26).

It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to modify the teachings of Mann with the teachings of Monahan to include a plurality of search engines with the motivation to allow a user to a particular web site that may be of interest (Monahan, col 1, lines 26-33).

Regarding Claims 2, 7, and 12, Mann teaches the claimed, "identifying at least one domain of the at least one search engine suited to service the query" (i.e. domain names consist of a root name or cipher followed by a period (pronounced "dot") which is then followed by what has been referred to as a "top level domain" indicator (e.g., ".com", ".org", ".gov", ".net",

Art Unit: 2175

".cc", and other domains such as country codes, etc. (col 1, lines 14-33).

Regarding Claims 3, 8 and 13, Mann teaches the claimed, "analyzing the content of a query to determine the at least one content category of the query" (col 3, lines 50-55) "and identifying at least one domain of the at least one search engine suited to service the query according to the content category" (col 7, lines 1-22) Figure 5A, #507).

Regarding Claims 4, 9, and 14, Mann teaches the claimed, "identifying the at least one domain according to a scope of the query" (i.e. moneytax.com) (col 4, lines 29-39).

Regarding Claims 5, 10 and 15, Mann teaches the claimed, "child categories" (i.e. domain names in accordance with userspecified criteria such as user-specified root terms or names which are automatically concatenated, in particular the root specifies a parent within the hierarchy in which the sub root is the child) (col 4, lines 10-18).

## Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this

Art Unit: 2175

action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Diane D. Mizrahi whose telephone number is (703) 305-3806. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dov Popovici can be reached on (703) 305-3806. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-9000 for regular communications and (703) 305-9000 for After Final communications.

Art Unit: 2175

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-9001.
